EDUCATION

University of California: San Diego

Major: Computer Science (B.S.) | Minor: Math Education

La Jolla, CA

Sep. 2025 – Present

RELEVANT COURSEWORK

CSE 29 Systems Programming and Software Tools (A)

UC San Diego

Spring 2026

La Jolla, CA

- Developed hands-on programs in C within a UNIX environment, focusing on low-level program execution and memory allocation.
- Debugged code using software development tools including GDB and Valgrind.
- Studied core computer architecture concepts including binary data representation, assembly execution, process communication, and memory hierarchies.

CSE 12 Basic Data Structures and Object-Oriented Design (A)

UC San Diego

Winter 2026

La Jolla, CA

- Used and implemented basic data structures including linked lists, stacks, and queues.
- Used advanced structures such as binary trees and hash tables.
- Focused on object-oriented design including interfaces, polymorphism, encapsulation, abstract data types using Java and Java Collections.

EXPERIENCE

Substitute Clerk Typist I

Moreno Valley Unified School District

Aug. 2025 – Present

Moreno Valley, CA

- Oversee secure visitor check-ins at the front office.
- Communicate with students and parents via in-person and telephone to address general inquiries.
- Record student attendance, including tardiness and early leave, through the Q Student Information System.
- Utilize the IncidentIQ ticketing system for the relocation of damaged or misplaced Chromebooks.

S.H.I.N.E Intern

Technology, Innovation, and Assessment | Moreno Valley Unified School District

Jun. 2025 – Jul. 2025

Moreno Valley, CA

- Communicated with customers on-site to deliver technical solutions by troubleshooting or exchanging devices.
- Supported supervising IT staff with daily operational tasks: managing student information; using the IncidentIQ ticketing system; and repairing/sanitizing damaged devices.
- Maintained accurate inventory records of Chromebooks and Lenovo devices; and update their operating systems.
- Installed OPS modules into the classrooms' interactive SMART Boards.

Programming Mentor | Volunteer

Computer Science Honor Society | Moreno Valley Unified School District

Jan. 2022 – Jun. 2025

Moreno Valley, CA

- Instructed students in core computer science principles—including variables, conditionals, and iterations—using minigames to structure the learning environment.
- Educated over 800 middle students in Java through JDoodle IDE and JavaScript through Code.org on-site.
- Educated over 300 elementary students in Blockly through Code.org over Zoom.
- Utilized public-speaking to deliver live classroom lectures and guide coding workshops.
